BAT Kenya recognised for sustained commitment to driving environmental excellence at the 18th KAM Energy Management Awards, 2022

BAT Kenya joined like-minded organisations at the Kenya Association of Manufacturers (KAM) 18th Energy Management Awards (EMAs) 2022, annual event, organised to recognise and celebrate trail blazing organisations within the energy management space.

During the event themed #PathwayToNetZero, BAT Kenya's sustainability efforts were once again recognised, with our Green Leaf Threshing Plant (GLTP) in Thika receiving an award in the Thermal Energy Savings category.

Speaking during the award ceremony, Head of Corporate Affairs, Mimi Mavuti said:

"As we accelerate the delivery of our Purpose, we've set ambitious targets for our environmental conservation agenda.

- i) Achieving carbon neutrality for scope 1 and 2 emissions by 2030 and for scope 3 by 2050,*
- ii) Reducing water withdrawn by 35% and Increasing water recycled to 30% by 2025,*
- iii) Achieving Net Zero Deforestation by 2025,*
- iv) Making all plastic packaging reusable, recyclable or compostable by 2025; and*
- v) 100% use of renewable electricity in our operations by 2030.*

As we accelerate our transformation, we are leading with purpose and driving a robust Environment, Social and Governance (ESG) agenda with the aim of building A Better Tomorrow™.
